JOURNAL OF THEORETICAL BIOLOGY

Chief Editor: J. F. DANIELLI
Associate Editor: L. WOLPERT

Editorial Board:
E. A. BARNARD
H. BREMERMANN
M. CALVIN
J. D. COWAN
N. GOEL
B. GOODWIN
J. MAYNARD SMITH
M. YČAS
J. Z. YOUNG

VOLUME 58

May 1976

ACADEMIC PRESS

London New York San Francisco

Printed in Great Britain

Contents of Volume 58

Number 1, 7 May 1976

SMOES, M.-L., Toward a Mathematical Description of Chemical Phase Waves 1

IJIRI, K. and EGAMI, N., A Mathematical Model for Germ Determination Process and Effect of Ultraviolet Light on the Process . . 15

STRANDBERG, M. W. P., Action Potential in the Giant Axon of *Loligo:* a Physical Model 33

NAGYLAKI, T., A Model for the Evolution of Self-fertilization and Vegetative Reproduction 55

OONUKI, M., Firing Probability of a Neural Network: First-order Differential Equation 59

Moffat, J. B. and Tang, K. F., A Theoretical Study of the Reactive Dimerization of HCN 83

HITCHINS, A. D., Spores as Potential Topological Markers in Bacterial DNA Segregation Studies 97

MICHEL-VILLAZ, M., Fluorescence Polarization: Pigment Orientation and Energy Transfer in Photosynthetic Membranes . . . 113

FUKUDA, N. and YAGO, N., Population Dynamics of Mitochondria. II. Turnover and Ageing of Rat Liver Mitochondria . . . 131

STEVENSON, D. R. and THOMPSON, C. J., Fairy Ring Kinetics . . 143

ABDULNUR, S., Why is 5-Fluorouracil a Mutagen? 165

HALL, L. H. and KIER, L. B., A Model for Drug-receptor Remote Recognition Applied to Certain Hydrogen Bonding Systems . 177

BONGRAND, P., CAPO, C., BENOLIEL, A. M. and DEPIEDS, R., Specialization in Phagocytosis 197

COHEN, R. J., The Avoidance Behaviour of *Phycomyces blakesleeanus:* Is Mediation by Natural Convection Significant? 207

PAILLOTIN, G., Capture Frequency of Excitations and Energy Transfer Between Photosynthetic Units in the Photosystem II . . 219

PAILLOTIN, G., Movement of Excitations in the Photosynthetic Domains of Photosystem II 237

Number 2, 21 May 1976

RAPPAPORT, H. P., An Analysis of the Binding of Related Ligands . 253

BLUMENFELD, L. A., The Physical Aspects of Enzyme Functioning . 269

VILLARREAL, E., AKCASU, Z. and CANALE, R. P., A Theory of Interacting Microbial Populations: Multigroup Approach . . 285

KLÄMBT, D. and RICHTER, O., Computer Programs for Studying Conformations in Ribonucleic Acids 319

HUTCHINSON, D. W., WHITTENBURY, R. and DALTON, H., A Possible Role of Free Radicals in the Oxidation of Methane by *Methylococcus capsulatus* 325

LEAKE, B. and ANNINOS, P. A., Effect of Connectivity on the Activity of Neural Net Models 337

PASTERNAK, C. A., The Cell Surface in Relation to the Growth Cycle. 365

DE HAËN, C., The Non-stoichiometric Floating Receptor Model for Hormone Sensitive Adenylyl Cyclase 383

FREIST, W. and CRAMER, F., A Binary Code Model for Substrate Recognition of Aminoacyl-tRNA Ligases 401

HARRIS, G. and OLSEN, I., A Possible Mechanism for the Synthesis of Antibodies 417

GOULDEN, P. T., The Biological Membrane Potential, Some Theoretical Considerations 425

RUCKENSTEIN, E., MARMUR, A. and GILL, W. N., Coverage Dependent Rate of Cell Deposition 439

COOKE, J. and ZEEMAN, E. C., A Clock and Wavefront Model for Control of the Number of Repeated Structures during Animal Morphogenesis 455

GILLESPIE, C. J., Towards a Molecular Theory of the Nerve Membrane: The Sufficiency of a Single-ion Queue 477

Index to Volume 58

ABDULNUR, S., Why is 5-Fluorouracil a mutagen, 165
Action potential in the giant axon of *Loligo*: a physical model, 33
AKCASU, Z. (see VILLARREAL, E.), 285
Aminoacyl-t RNA ligases, a binary code model for substrate recognition of, 401
Analysis of the binding of related ligands, 253
ANNINOS, P. A. (see LEAKE, B.), 337
Antibodies, a possible mechanism for the synthesis of, 417
Avoidance behaviour of *Phycomyces blakesleeanus*: is mediation by natural convection significant? 207

BENOLIEL, A. M. (see BONGRAND, P.), 197
Binary code model for substrate recognition of aminoacyl-tRNA ligases, 401
Biological membrane potential, some theoretical considerations, 425
BLUMENFELD, L. A., The physical aspects of enzyme functioning, 269
BONGRAND, P., CAPO, L., BENOLIEL, A. M. and DEPIEDS, R., Specialization in phagocytosis, 197

CANALE, R. P. (see VILLARREAL, E.), 285
CAPO, C. (see BONGRAND, P.), 197
Capture frequency of excitations and energy transfer between photosynthetic units in the photosystem II, 219
Cell deposition, coverage dependent rate of, 439
Cell surface in relation to the growth cycle, 365
Chemical phase waves, toward a mathematical description of, 1
Clock and wavefront model for control of the number of repeated structures during animal morphogenesis, 455
COHEN, R. J., The avoidance behaviour of *Phycomyces blakesleeanus*: is mediation by natural convection significant?, 207
Computer programs for studying conformations in ribonucleic acids, 319
COOKE, J. and ZEEMAN, Z. C., A clock and wavefront model for control of the number of repeated structures during animal morphogenesis, 455
Coverage dependent rate of cell deposition, 439
CRAMER, F. (see (FREIST, W.), 401

DALTON, H. (see HUTCHINSON, D. W.), 325
DE HAËN, C., The non-stoichiometric floating receptor model for hormone sensitive adenylyl cyclase, 383
DEPIEDS, R. (see BONGRAND, P.), 197
DNA, bacterial, spores as potential topological markers in segregation studies, 97

Effect of connectivity on the activity of neural net models, 337
EGAMI, N. (see IJIRI, K.), 15
Enzyme functioning, the physical aspects of, 269
Evolution of self-fertilization and vegetative reproduction, a model for, 55

Fairy ring kinetics, 143
Firing probability of a neural network: first-order differential equation, 59
Fluorescence polarization: pigment orientation and energy transfer in photosynthetic membranes, 113
5-fluorouracil, why is it a mutagen?, 165
FREIST, W. and CRAMER, F., A binary code model for substrate recognition of aminoacyl-tRNA Ligases, 401
FUKUDA, N. and YAGO, N., Population dynamics of mitochondria. II Turnover and ageing of rat liver mitochondria, 131

Germ determination process and effect of ultraviolet light on the process, a mathematical model for, 15
Giant axon of *Loligo*, action potential in: a physical model, 33
GILLESPIE, C. J., Towards a molecular theory of the nerve membrane: the sufficiency of a single-ion queue, 477
GILL, W. N. (see RUCKENSTEIN, E.), 439
GOULDEN, P. T., The biological membrane potential, some theoretical considerations, 425
Growth cycle, the cell surface in relation to, 365

HALL, L. H. and KIER, L. B., A model for drug-receptor remote recognition applied to certain hydrogen bonding systems, 177
HARRIS, G. and OLSEN, I., A possible mechanism for the synthesis of antibodies, 417
HCN, a theoretical study of the reactive dimerization of, 83
HITCHINS, A. D., Spores as potential topological markers in "bacterial DNA segregation" studies, 97
Hormone sensitive adenylyl cyclase, the non stoichiometric floating receptor model for, 383
HUTCHINSON, D. W., WHITTENBURY, R. and DALTON, H., A possible role of free radicals in the oxidation of methane by *Methylococcus capsulatus*, 325
Hydrogen bonding systems, a model for drug-receptor remote recognition applied to, 177

IJIRI, K. and EGAMI, N., A mathematical model for germ determination process and effect of ultraviolet light on the process, 15

KIER, L. B. (see HALL, L. H.), 177
KLÄMBT, D. and RICHTER, O., Computer programs for studying conformations in ribonucleic acids, 319

LEAKE, B. and ANNINOS, P. A., Effect of connectivity on the activity of neural net models, 337
Loligo, action potential in the giant axon of: a physical model, 33

MARMUR, A. (see RUCKENSTEIN, E.), 439
Mathematical model for germ determination process and effect of ultraviolet light on the process, 15
Membrane potential, biological, some theoretical considerations, 425

Methane, oxidation of by *Methylococcus capsulatus*, a possible role of free radicals in, 325
Methylococcus capsulatus, A possible role of free radicals in the oxidation of methane by, 325
MICHEL-VILLAZ, M., Fluorescence polarization: pigment orientation and energy transfer in photosynthetic membranes, 113
Microbial populations, interacting, a theory of: multi-group approach, 285
Mitochondria, population dynamics of. II. Turnover and ageing of rat liver mitochondria, 131
Model for drug receptor remote recognition applied to certain hydrogen bonding systems, 177
Model for the evolution of self-fertilization and vegetative reproduction, 55
MOFFAT, J. B. and TANG, K. F., A theoretical study of the reactive dimerization of HCN, 83
Molecular theory of the nerve membrane: the sufficiency of a single-ion queue, 477
Morphogenesis, animal, a clock and wavefront model for control of the number of repeated structures during, 455
Movement of excitations in the photosynthetic domains of photosystem II, 237
NAGYLAKI, T., A model for the evolution of self-fertilization and vegetative reproduction, 55

Nerve membrane, towards a molecular theory of: the sufficiency of a single-ion queue, 477
Neural net models, effect of connectivity on the activity of, 337
Neural network, firing probability of: first-order differential equations, 59
Non stoichiometric floating receptor model for hormone sensitive adenylyl cyclase, 383

OLSEN, I. (see HARRIS, G.), 417
OONUKI, M., Firing probability of a neural network: first-order differential equation, 59

PAILLOTIN, G., Capture frequency of excitation and energy transfer between photosynthetic units in the photosystem II, 219
PAILLOTIN, G., Movement of excitations in the photosynthetic domains of photosystem II, 237
PASTERNAK, C. A., The cell surface in relation to the growth cycle, 365
Phagocytosis, specialization in, 197
Photosynthetic membranes, pigment orientation and energy transfer in: fluorescence polarization, 113
Photosynthetic units in the photosystem II, capture frequency of excitations and energy transfer between, 219
Photosystem II, capture frequency of excitations and energy transfer between photosynthetic units in, 219
Photosystem II, movement of excitations in the photosynthetic domains of, 237
Phycomyces blakesleeanus, the avoidance behaviour of: is mediation by natural convection significant? 207
Physical aspects of enzyme functioning, 269

Population dynamics of mitochondria. II. Turnover and ageing of rat liver mitochondria
Possible mechanism for the synthesis of antibodies, 417
Possible role of free radicals in the oxidation of methane by *Methylococcus capsulatus*, 325

RAPPAPORT, H. P., An analysis of the binding of related ligands, 253
Ribonucleic acids, computer programs for studying conformations in, 319
RICHTER, O. (see KLÄMBT, D.), 319
RUCKENSTEIN, E., MARMUR, A. and GILL, W. N., Coverage dependent rate of cell deposition, 439

Self-fertilization and vegetative reproduction, a model for the evolution of, 55
SMOES, M.-L., Toward a mathematical description of chemical phase waves, 1
Specialization in phagocytosis, 197
Spores as potential topological markers in bacterial DNA segregation studies, 97
STEVENSON, D. R. and THOMPSON, C. J., Fairy ring kinetics, 143
STRANDBERG, M. W. P., Action potential in the giant axon of *Loligo*: a physical model, 33

TANG, K. F. (see MOFFAT, J. B.), 83
Theoretical study of the reactive dimerization of HCN, 83
Theory of interacting microbial populations: multigroup approach, 285
THOMPSON, C. J. (see STEVENSON, D. R.), 143
Toward a mathematical description of chemical phase waves, 1
Towards a molecular theory of the nerve membrane: the sufficiency of a single-ion queue, 477

Ultraviolet light, effect of on germ determination process and a mathematical model for, 15

Vegetative reproduction and self-fertilization a model for the evolution of, 55
VILLARREAL, E., AKCASU, Z. and CANALE, R. P., A theory of inter-acting microbial populations: multigroup approach, 285

WHITTENBURY, R. (see HUTCHINSON, D. W.), 325
Why is 5-fluorouracil a mutagen? 165
